

# JIEB Reviewer Recognition Program

**Dear JIEB Reviewers,**

We are thankful for your commitment and contributions to JIEB. We acknowledge that your contributions of providing timely and critical reviews have helped our authors to improve the quality of their manuscripts. Subsequently, without your thorough and insightful reviews, JIEB would not be able to publish high quality papers. Upon recognizing how valuable your role is to our journal, we would like to announce that JIEB has launched two mechanisms to acknowledge the hard work of JIEB's reviewers.

## 1. Integration to Publons

In March 2022, JIEB will begin its integration with Publons, a system that provides reviewer recognition. When reviewers receive review requests, reviewers will be able to select whether they want their review to be recognized in Publons. If you choose to be recognized, your review will be verified and you may generate a public CV containing your review contributions. Publons have been used by reputable journals indexed by Scopus. By integrating JIEB to Publons, we are welcoming our reviewers to join the global research community. More importantly, being recognized in Publons is expected to increase international exposures for our reviewers. JIEB will send detailed information about Publons.

## 2. Reviewer Award

As a recognition for our reviewers, JIEB will launch the 1st JIEB Reviewer Award in 2022. Reviewer award will be given to three reviewers who are selected based on four criteria such as the timeliness, the frequency, the detail, and the constructiveness of their review during the corresponding year. Three reviewers will be selected to receive the JIEB Reviewer Award during our annual international conference GAMA ICEB in September.

**Again, we thank you for your valuable contributions for JIEB. We look forward to working with you in 2022 and beyond.**

Warm regards,
